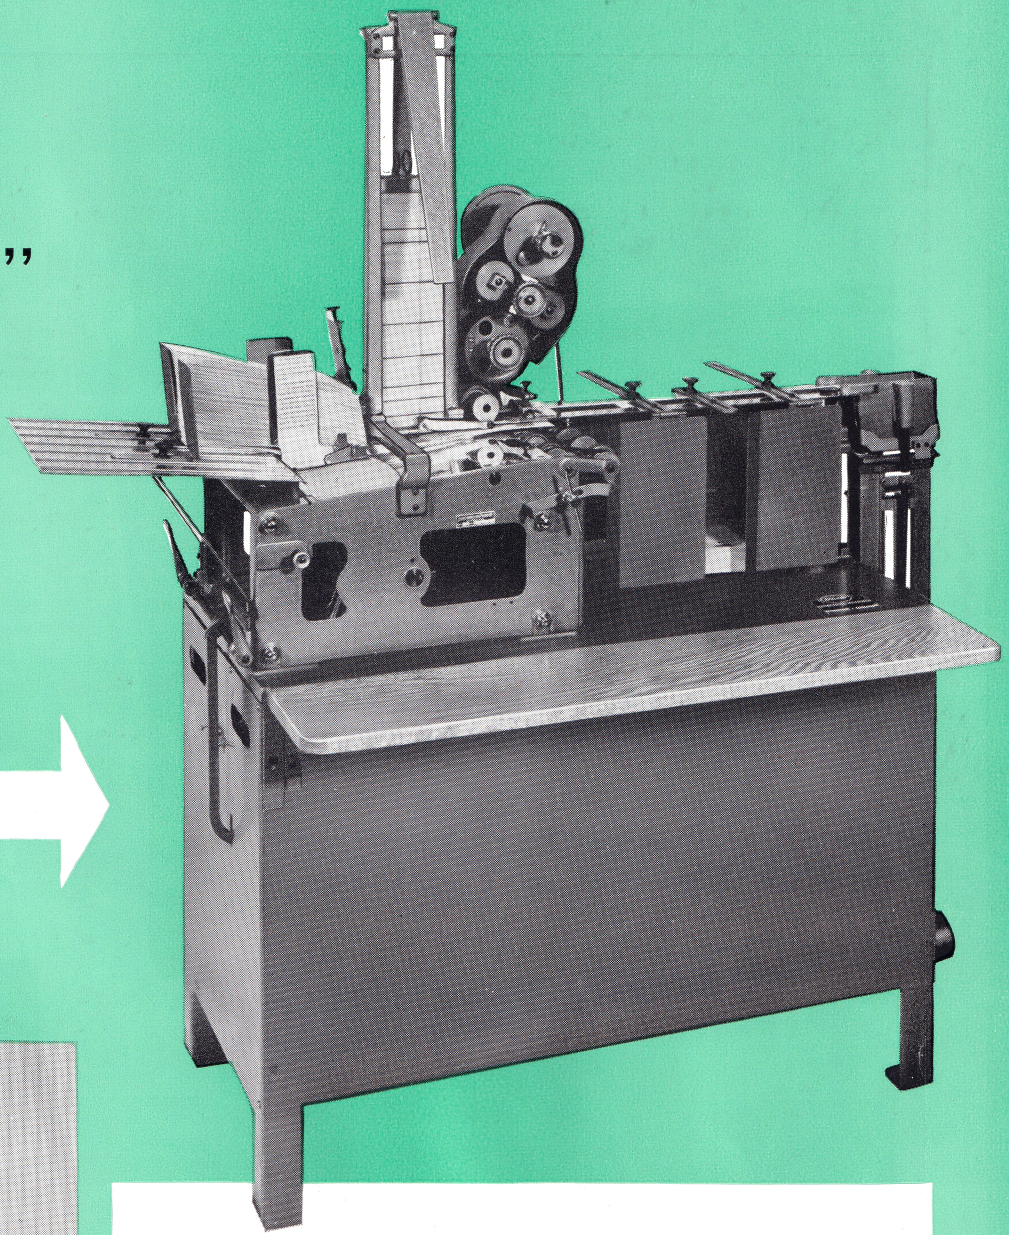
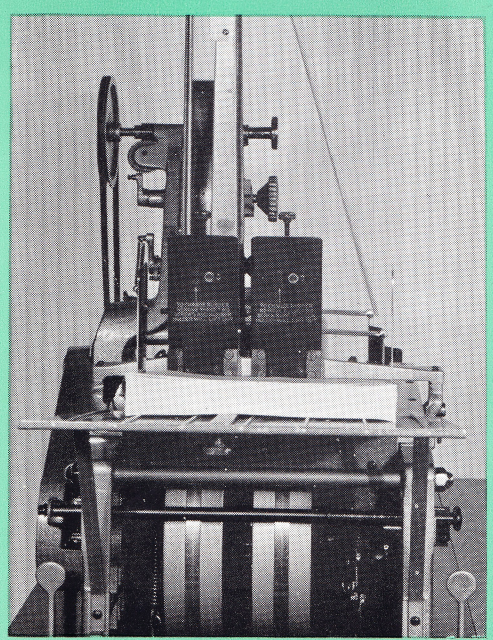
Elliott

"MODEL 5500"

Entirely Automatic

ADDRESSING MACHINE





Where automatic address selection and skipping are not required, this is the fastest, simplest, and lowest-priced, heavy duty, automatic envelope-feed addresser made by Elliott.

For the automatic address of envelopes of LARGE SIZE. Has double feed-drums, as illustrated in detail at left.

It need never be stopped for the insertion or removal of address stencils or addressed forms, or for re-inking. The constant output is 200 addresses per minute, hour after hour.

It operates at a continuous speed of 12,000 different addresses per hour

LS5500(N) 6-56-5-5-RA

Printed in U. S. A.

In this picture the size of Model 5500 is indicated by the operator and the cabinets which hold 100,000 Address Stencils.
